British design

Designed in-house at New Design Group, SW19 is a lightweight, strong and durable high density stacking chair with a veneered plywood seat and back. SW19 is perfect for auditorium, cafe and informal meeting use and is also available in a fully upholstered option.

Designed and made in-house at New Design Group, the SW19 is a fantastic example of UK manufacturing.

Stacking

Oak or Beech seat and back

SW19 Chair

Stacking

Single trolley available allowing chairs to stack 40 high, taking up only 0.5sq. meters of floor space.

Linking

Floor linking available to allow for efficient auditorium use. Simple link design means that linking and unlinking is quick and simple.

Staining

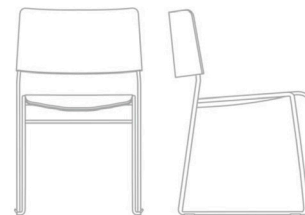

Seats and backs can be stained to match woods outside of the standard finishes of Oak and Beech.

Lacquers

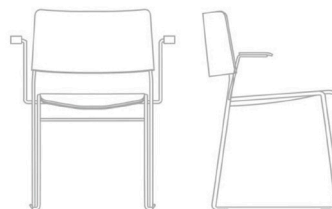

Seats and backs can be lacquered in an unlimited array of colours to either contrast or match your chosen frame colour.
