

ENVIRONMENTAL INFORMATION

FSC®

The Forest Stewardship Council (FSC®) is an international, non-governmental organisation dedicated to promoting responsible management of the world's forests.

A large number of our products involve the use of timber in their construction.

We use a variety of timber such as MDF (medium density fibreboard), solid beech and solid oak, this timber has always been procured from sustainable sources but we are now using an increased percentage of FSC® certified timber as standard. This provides assurance to our clients that the timber we use comes from the most responsible suppliers.

A large proportion of our table tops are supplied with FSC® as standard, look for the tree  icon on individual product pages.

CHAIN OF CUSTODY

Chain of custody certification is how the FSC® verifies that forest-based materials produced according to their standards are credibly used along the product's path, from the forest to becoming finished goods. The FSC® logo on a finished product signals that the materials used during production have met the chain of custody requirements at every step in the supply chain, from sourcing to distribution.

Any of our products can be FSC® Certified, if you require your order to be FSC® but you can't see the tree icon next to it, please make it clear to us at point of enquiry so we can ensure the correct procedures are followed to enable this.

FISP

FISP is an independently certified sustainability programme created to tailor to the needs of the Furniture Industry supply chain. FISP promotes best practices to drive social, economic and environmental change by continually improving members' business operations. FISP is the recognised benchmark for sustainable practices in the UK furniture industry.

Procurement teams and furniture specifiers widely reference it as critical to an organisation's sustainable procurement policies.

ISO 14001:2015

ISO 14001 is the international standard that specifies requirements for an effective environmental management system (EMS).

By adhering to this standard, organizations can ensure they are taking proactive measures to minimize their environmental footprint, comply with relevant legal requirements, and achieve their environmental objectives.

ECCS

The ECCS (Environmental Commitment Certification Scheme) enables us to show our commitment to achieving carbon Net Zero and confirms that we have a plan in place, as well as calculating our actual current carbon footprint so we can make steps to offset and reduce it.
