Leather for a Modern World

Since 1840, Muirhead has been at the forefront of the leather industry, producing Fine Scottish Leather from hides reared through a unique blend of animal husbandry and fertile grazing, predominantly from Scotland.

Each and every hide is unique, with its own character and qualities, including growth lines, scars, and variations of grain and tone. These are testament to the natural origin of the leather and should not be regarded as a defect or fault.

Access to the finest raw materials helps us provide our customers with consistently high quality, Scottish leather.

We have an enviable track record in developing innovative solutions, on time and to budget, across the diverse industries that we supply.

Offering a range of the finest leather in a wide variety of colours and finishes, we can meet the exacting needs of the modern designer.

Our Unique Leather

Caledonian
1.0mm super luxury leather with a matt finish and a haircell grain suitable for all domestic and contract upholstery applications.

Grampian
1.2mm high quality leather with luxurious pebbled grain which is suitable for use in any high traffic environment.

Lustrana
1.0mm premium leather with a bright two-tone finish and a haircell grain, suitable for many contract and domestic applications, and popular for traditional style upholstery.

Sateen
1.0mm premium leather with a matt finish and a haircell grain. Fully fire retardant and certified to conform with airworthiness and public seating specifications.

Environmental Pioneers

Our goal is to maintain a sustainable business. Our parent company, Scottish Leather Group, is setting standards for sustainability within the leather sector as evidenced by our investments, performance and recognition through accreditations gained. Our product footprint is measured using Life Cycle Analysis

Major investments in membrane water treatment technology for water recycling and the Thermal Energy Plant, which is recovering heat from waste, have reduced the company's impact on the environment. These initiatives are also addressing some of the major threats to our long-term future, such as the reduction in available landfill sites and the declining availability of fossil fuel. Benefits will be derived ultimately through mitigation of the effects of rising landfill and energy costs.

Visit sustainablebynature.com for more information.

Perforation

Any of the leathers on this card can be perforated post production. Due to the process of perforating, we advise contacting the sales office to discuss individual requirements.

Disclaimer

The colour of our digital swatches can vary depending on individual screen settings.

Therefore, please always request physical samples before placing an order.

Technical Excellence

All of our leathers are tested and certified to meet the most exacting standards of performance and safety.

Our standard stock leathers within this card are tested to British Standard BS 6608:1985 and EN ISO 13336 for thickness, tear strength, flexing endurance, colour fastness, resistance to blocking, adhesion of finish and pH of aqueous extract.

They also conform to BS 5852:2006 Clause 11, ignition source 5 when tested with suitable combinations.

For full details of the tests, visit muirhead.co.uk/products

Care for Your Leather

Protect from:

- Excessive heat
- Direct sunlight
- Sharp objects

Regular care:

- Vacuum clean
- Avoid chemical polishes or soap
- Polish with dry cloth

Cleaning:

- Damp cloth for regular cleaning
- Do not soak the leather

Bespoke Ordering & Sampling

As a flexible, vertically integrated tannery, we are best placed to take care of any bespoke leather you may require.

We typically produce A4 samples within one working week, from your Pantone, RAL or NCS colour references, allowing you to take our fine Scottish leather and customise it for your specific requirements. Custom production follows your colour match approval.

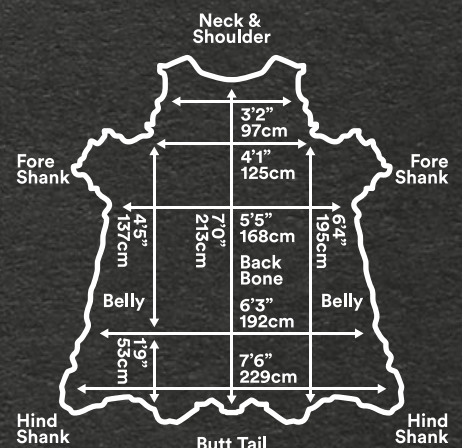

Orders from our stock ranges placed before 12pm are despatched the same day to the UK mainland for next day delivery.

An individual swatch sample in any of the colours shown can also be ordered online, via email, or by contacting the sales office.

muirhead.co.uk offers online sampling as well as a range of other services, including contact details for your nearest representative and a valuable insight into the markets we currently supply, as well as general company information.

Know Your Hide

As leather is a natural product, each and every hide is unique in its characteristics, shape and size. With Muirhead only sourcing hides from the UK and Ireland, the average hide size is larger than those from further afield and will be approximately 4.7m² or 50.6ft². As this is an average there will of course be some hides that are smaller and larger than 4.7m².
