30 year warranty on solid wood option.

Power & data available.

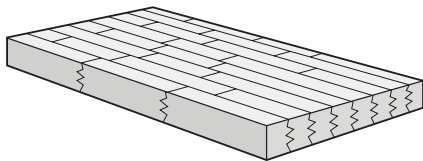

Large range of standard sizes.

Made from sustainably sourced timber.

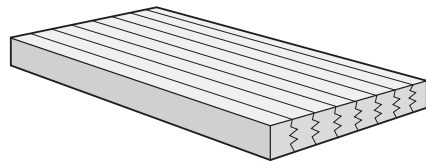

Solid Wood Construction Choices

Prima

Randomly arranged staves offering a higher colour variation.

Royal

Long, continuous staves, meticulously colour-sorted.

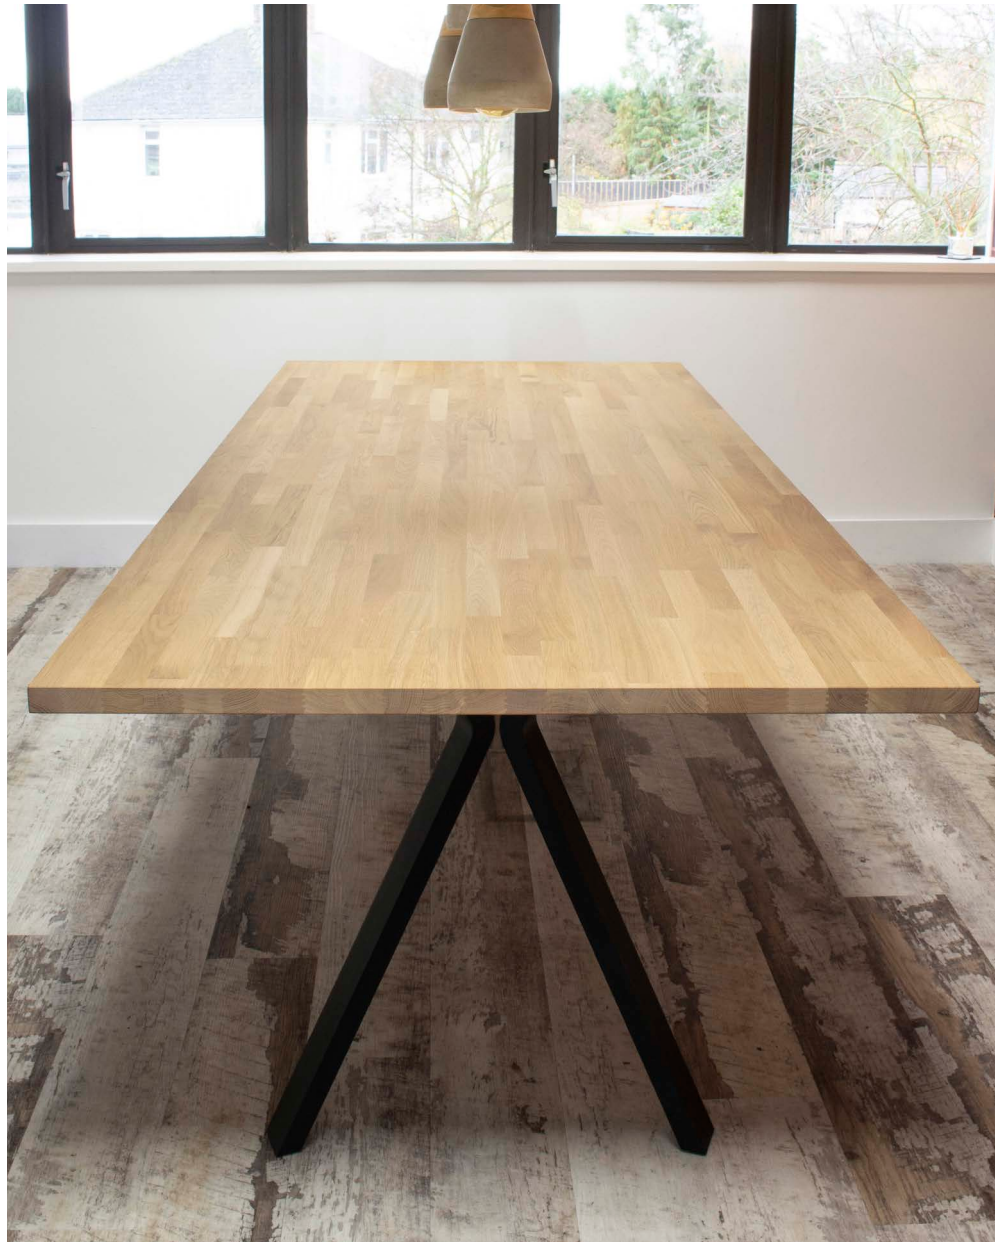

Manufacturing Process

Every single table starts with just one stave. Carefully hand selected, quality inspected & colour-sorted. Then assembled according to the client's specifications by experienced carpenters, who take pride in ensuring that all tables are finished to the highest quality.

Manufacturing Process

The table top is assembled using tongue-and-groove joints throughout the depth and finger joints along the length of the front edge. This unique assembly provides an extra glue surface of up to 40% and minimizes the risk of glue cracks significantly. The result is a beautiful, long lasting worktop. The glueings are so strong, that it is guaranteed for 30 years.
